Hi –

Nick Bryan is calling me about the 30 days to complete initial inspection of valves. He thinks they have 180 days because it's a whole new facility...it's a new fractionation system, but the towers haven't started. Gas not associated with the columns can move through that piping, thus starting the 180 days.

I am just getting back from vacation. Can we have a short call late tomorrow to discuss? I asked him to send me the letter they sent you. Thanks!
